Revolutionizing Visitor Management With The Power of Insight

Ditch the Clipboard and Bring Your Visitor Management Into the 21st Century

The future of visitor management is here. From simplifying prescreening to automating compliance reporting, HELIAUS® Guest is revolutionizing visitor management for even the busiest organizations, all over the world.

Is your visitor management process stuck in the past — relying on paper sign-in logs, clipboards, and pens? This manual, outdated process leads to long lobby lines, frustrated guests, and stressed security teams, while often producing illegible and inaccurate records. Hardly secure, hardly modern, and hardly the way an advanced organization wants to be perceived.
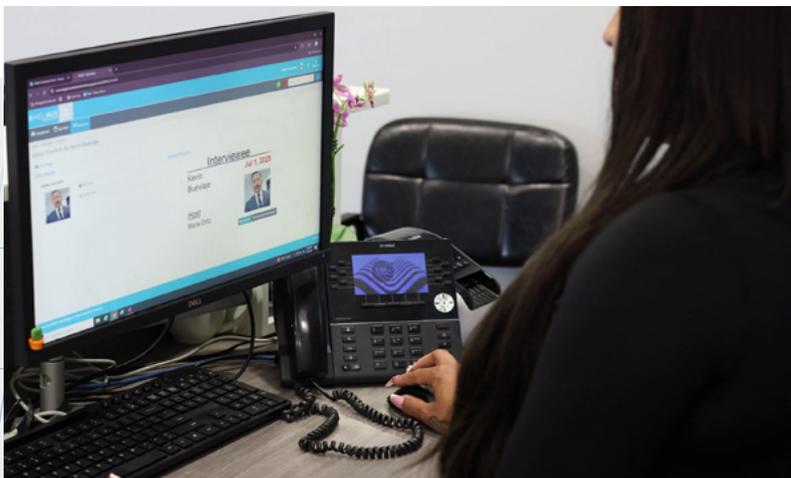

No More Paper Logs, No More Lines

With HELIAUS Guest, welcoming and registering visitors is quick, modern and touch-free.

› **Pre-Registration**: When someone from your organization invites a guest via Outlook or Gmail, they are able to pre-register the guest, providing all relevant data. This makes check-in a breeze with the guest simply providing the auto-generated QR code that was sent via email.

› **On-the-Spot registration**: If a guest has not been pre-registered, we can customize your registration form to capture all relevant data you need to grant access to your workspace. It's simple, it's seamless, it's HELIAUS Guest.

Achieve Results You Want

With HELIAUS Guest you can:

› Ditch the Clipboard
› Improve Visitor Experience
› Enhance Security
› Enforce Compliance

Upgrade to a Visitor Management System Built for Today's Operational Needs.

HELIAUS Guest is the solution your organization needs to reach new levels of security and efficiency. So say goodbye to the clipboard, and contact us for a demonstration today at **aus.com/heliaus-guest**.

Visitor Arrival is Only the Starting Point

HELIAUS® Guest goes beyond streamlining entry. It automates every process associated with the visitor lifecycle, including creating audit trails that can improve everything from risk management to investigation to compliance reporting. HELIAUS Guest also aids in enforcing security, non-disclosure, and visitor policies, along with watch list-based entrance-refusal instructions.

Core Capabilities

Visitor Experience

Real-time data visualization for easy processing of information and identification of trends and/or exceptions.

Advancements

Give your organization the most advanced security, management, and efficiency:

- › **Quick, hassle-free installation**
- › **Accessible on any device**: desktop, tablet, or mobile
- › **Intuitive design**: easy for all staff to use
- › **Outlook and Gmail**: visitors register via calendar integration
- › **Compatible with standard peripherals**
- › **Simple licensing**: one license covers your entire building
- › **Comprehensive and secure**: delivering a seamless, compliant solution

Security Tools

Give the security team the tools needed to do their jobs better:

- › **Streamlined visitor flow**: HELIAUS Guest manages multiple visitors simultaneously, reducing crowd control challenges
- › **Reduced errors**: Prescreening and credential verification are automated ahead of each visit
- › **Automatic host notifications**: No need for phone calls; hosts are alerted immediately via email or text upon guest check-in
- › **Real-time insights**: Enjoy instant verification and detailed reporting for better oversight
- › **User-friendly design**: Simplifies processes for both security teams and visitors
- › **Enhanced building safety**: Only verified visitors get approved entry, providing a more secure environment

"

We recently implemented the HELIAUS Guest visitor management system at our Omaha, Norcross and Limerick locations, and the transformation has been remarkable. HELIAUS Guest has exceeded our expectations, and I would not hesitate to recommend it to any organization looking to elevate their visitor management process.
