

## Unified Command Technology Rapid, Scalable Deployment Surveillance For Any Event Site

### Trusted at the World's Most High-Profile Events

In today's high-profile event environments such as concerts, festivals, sporting events, rodeos, and conventions, seamless security and crowd management are essential. Unified Command Technology delivers rapid, temporary surveillance solutions that enhance visibility, streamline operations, and reduce risk. From monitoring crowd flow to managing traffic and capturing critical incident footage, our systems bring the power of permanent surveillance to any event, anywhere.

### Core Capabilities

**Rapid, Scalable Deployment:** Deploys in hours and adapts to any venue, even open fields or downtown urban settings.

**Crowd Monitoring & Logistics:** Tracks crowd movement in real time to prevent congestion and support safety operations.

**Parking and Traffic Flow:** Monitors parking lots and surrounding roads to streamline access and reduce delays.

**Incident Documentation:** Captures high-resolution video to support investigations and reduce liability risk.

**Unified Command Center:** Centralizes all video, communications, and alerts for faster, coordinated response.

**Advanced Video Technology:** Uses AI, LPR, and remote access tools to enhance detection and response across the venue.

# Optimized Delivery Model: Plan, Deploy, Monitor

## Plan

- > Collaborate with event security, IT, power, and comms teams
- > Build site plans, camera maps, and resource blueprints

## Deploy

- > Install surveillance in high-impact areas
- > Integrate all camera feeds and data sources into a centralized command platform

## Monitor

- > Trained staff operate equipment and radios
- > Live monitor for early detection, incident escalation, and decision support for police/fire/EMS

## Unmatched Knowledge & Experience

### Efficient Deployment

- > Specialized in operating in resource-poor environments with limited power or internet.
- > Custom toolbox of low-power, high-efficiency solutions developed through continuous R&D.

### Direct Vendor Access

- > Preferred partnerships with top-tier vendors including early access to hardware, firmware customizations, and rapid engineering support.
- > Priority data access to maintain uninterrupted surveillance streams.

### Elite Staff

- > Technicians are cross-trained and experienced in law enforcement and military operations.
- > Nimble, disciplined, and focused on rapid problem-solving under pressure.
