

COBALT

Modern robotic security bridges the gap between artificial intelligence and human response.

Achieve greater situational awareness using state-of-the-art robotic technology that delivers enhanced security capabilities with a personal touch.

Powered by sensor technology, cutting-edge algorithms and machine-learning, Allied Universal provides a service model that helps protect people and assets while interacting with them in their workplace.

Cobalt as a Service (CaaS) bridges the gap between security personnel and hardware, and leverages the strength of both to provide exceptional physical security and facilities management services. Cobalt provides an intelligent, friendly service with a roving presence that helps keep premises secure.

- The Cobalt robot patrols autonomously to detect anomalies and send relevant notifications.
- Security specialists receive the notifications in real time.
- A security specialist immediately responds and manages the event.

With the assurance that your facilities are constantly monitored to accurately detect and report anything out of the ordinary, your personnel are able to focus on more strategic objectives.

Key Features

- Autonomous night/weekend patrols
- Two-way audio/video communication
- Thermal and 8mp cameras for visual detection
- Multi-directional microphone array detects sound and notifies specialists
- Intruder detection and deterrence
- Designed for human interaction (stands 5'1")
- Touch-screen panel interface for communications and human response
- Durable fabric exterior designed to blend in with business culture and interiors
- Mobile PA system
- Badge reader integration
- Best-in-class LED alert/signal ring to detect and alert on anomalies

Key Benefits

- Customized to facility needs and easy to install
- Continuous, automated patrol, detection and deterrence
- Accurate objective recall and consistent reporting
- Superhuman sensing, including sight, ultrasound and temperature
- Genuine interactions through two-way video and audio communication with security specialists
- Complete control with over-ride pilot option
- Brand enhancement
- Real-time, flexible response through video chat
- Relevant and timely incident reporting
- Daily and weekly reporting for trend analysis and compliance
