

Real-Time Online Risk Analysis

Leveraging the latest in data processing, analytics and machine learning, security operators, HR and compliance groups can cut through the noise of online chatter to quickly identify corporate threats and insights in real time. This advanced monitoring platform eliminates the clutter and false positives of traditional threat intelligence solutions at a fraction of the cost.

Allied Universal delivers a flexible solution that provides visibility and insight into online risk across an entire organization. Powered by ThreatMinder's cyber and social media monitoring platform, the system scours the web, dark web and social media using a proprietary combination of technologies and U.S. intelligence agency best-practices to identify potential risks and notify businesses of potential threats in real time.

From security to HR and compliance, threat intelligence can be available at the departmental level; automating and simplifying proactive intelligence for use by anyone in the organization. When a threat is detected, it is communicated via alert or integrated into existing platforms for seamless situational awareness that provides the broadest possible discovery and evaluation. Early detection of threats helps protect your most crucial assets.

- Risks to business continuity
- Physical threats to property and personnel
- Pre-hire checks
- Intellectual property theft and risk
