

## REMOTE CAPABILITIES

## INTELLIGENT, REAL-TIME MONITORING & RESPONSE

### KEY BENEFITS

- ▶ Force multiply existing security team and enhance day-to-day security operations
- ▶ Additional supervision in applicable scenarios at minimal cost
- ▶ Customer portal to see security events and reports instantaneously
- ▶ Project management, design, engineering, and installation of security systems
- ▶ Realize additional potential savings on in-house security devices
- ▶ Strategically enhance security operations to improve cost efficiency & ROI
- ▶ Attractive warranty offerings for system repair and maintenance

**Mitigate risk with event-based video monitoring and response services that do more than just watch; they prompt proactive intervention. Allied Universal<sup>®</sup> Technology Services provides end-to-end, dynamic solutions to enhance situational awareness and improve security posture, while reducing operational cost.**

Leveraging video analytics with real-time, event-based monitoring by our Security Intervention Specialists, Allied Universal<sup>®</sup> Technology Services provides customized solutions that are scalable, reliable, and efficient. Remote Video Monitoring solutions improve security operations through enhanced services, deter theft, and mitigate the criminal element.

**Allied Universal<sup>®</sup> Technology Services provides complete solutions, including installation and support for cameras, access control systems, traditional alarms, and remote audio features.** Using the most efficient video analytics systems on the market, Allied Universal<sup>®</sup> Technology Services enable you to record and transmit video alarms to deter and mitigate threats through on-premise surveillance of cameras. Based on your unique security protocols, any correlating events are monitored in real time by experienced Security Intervention Specialists at the Allied Universal Monitoring and Response Center (MaRC) and escalated for response. Video monitoring solutions integrate into the enterprise security program and force multiply Global Security Operating Center (GSOC) services with proactive capabilities such as:

- › Customize security practices from client locations to the MaRC
- › Target key areas & known vulnerabilities with virtual perimeters
- › Open doors or industrial gates remotely after authentication
- › Respond to traditional fire/intrusion alarms or building systems
- › Answer phones & dispatch security personnel to incidents
- › Call & notify the emergency first responder with a verified crime in progress
- › Document & deliver incident reports

---

### KEY FEATURES

- › 24/7 Real-Time Focus on Response to Alerts
- › Guided (Protocol-Based) Alarm-to-Event Resolution
- › Immediate Event Analysis
- › Perimeter & Virtual Fence Monitoring
- › Object Appearing/Disappearing Recognition & Detection in Cameras' Field of View
- › Customized Protocols & Event-Based Alerting Schedules
